JULIEN DUBUC

Second-year engineering student

BACKGROUND

SeaTech, Engineering School 2024-2027
Toulon, France

SYSMER Course (Mechatronics and Robotics Systems)

- electronics, robotics, CAD, computer science, mechanics, materials

Creativity and Innovation / Entrepreneurship Minor

- managing a project, supervising a team, marketing, co-creation

Intensive pre-Engineering school Prep program 2022-2024
Le Havre, France

- mathematics, physics and chemistry, engineering sciences

Bachelor's degree (with honors) 2019-2022
Le Havre, France

PROFESSIONAL EXPERIENCE

Construction Assistant Internship June-July 2025
Le Havre, France

- I discovered construction site monitoring, managed workers on site, and observed the functioning of the technical department in social housing management.
- I created Excel tables and analyzed the finances of real estate projects (construction, renovation, acquisition, improvement).

Physical Therapy Assistant Internship February 2019
Le Havre, France

- I worked with patients and assisted in their rehabilitation.
- I used complex rehabilitation equipment (electrostimulation devices).

Logistics Assistant Internship February 2019
Le Havre, France

- I learned about organizational and logistical processes in shelf stocking.
- I worked with the team to optimize product presentation and ensure proper product rotation.

PROJETS

Floating and Underwater Breakwaters : I led a team of 10 students to study floating and underwater breakwaters.

I installed sensors, ran the wave basin, and analyzed the data in MATLAB.

I co-wrote the report and presented our results to the teachers and the CEO.

AI for Hexapawn : I created an AI for the game Hexapawn.

I coded the game and built an AI (machine learning).

I created a tree of all possible moves so the AI could win instantly.
